Databases: MySQL, SQL, Microsoft SQL Server, MongoDB

CMS: WordPress, Wix, Weebly

Platforms: Azure, Docker

Tools: GitHub, Figma, Canva

ABOUT ME

As an IT Web Programming graduate and frontend enthusiast, I am passionate about combining creativity and functionality to deliver stunning results. Did my first website consist of a single HTML page about cats with brutal inline styling and major 1991 Microsoft PowerPoint vibes? Why yes, it did. Since that first attempt, I've developed my full stack capabilities, sharpened my communication and design skills, improved time management to prioritize tasks effectively, and cultivated problem-solving abilities while knowing when to seek help. In 18 of the 25 courses I took I earned a grade of 98, 99, or 100 percent. Collaboration and empathy are central to my work, enabling me to connect effectively with clients and teams. Whether debugging JavaScript or creating pixel perfect responsive designs, I've embraced the continuous learning that is essential to a successful career in IT.

WORK EXPERIENCE

Web Developer
Nova Scotia Community College | May 2024 – June 2024
- Migrated NSCC IT Job Fair site to WordPress from a Laravel project, implementing a custom developed theme and plugin integration.
- Created a custom form plugin allowing users to register for the event, including branching sections for organization or student registration.
- Created a custom plugin with dashboard admin pages for reports pulling information from form registration plugin with CSV capabilities.

Applied Research Assistant
Nova Scotia Community College | January 2024 – June 2024
- Created high fidelity wireframes from business requirements for an inventory asset tracker application for Shelter NS.
- Worked with React to build components such as authorized login interface, CRUD functionality for items, and user profiles.
- Styled components using SASS to provide a cohesive look across application interfaces.

IT Camp Coordinator
Nova Scotia Community College | June 2023 – Sept 2023
- Designed IT curriculum for children aged 8-13, fostering an enthusiasm for STEM careers.
- Delivered curriculum to campers, combined with IT focused games and team challenges.
- Provided individualized support to campers, ensuring diverse learning needs were met and encouraging collaborative problem-solving.

Microsoft Help Desk Technician
Microsoft - Arvato Bertelsmann | February 2015 – February 2017
- Increased team productivity by 500% by creating a templating and case routing system that streamlined client communication.
- Resolved complex cases for high-value clients with contracts exceeding $1 million.
- Enhanced client satisfaction by 30% through improved efficiency, and resolution times.
